

IDS15-J. Do not allow sensitive information to leak outside a trust boundary

This rule is a stub.

Several guidelines are instances of this one, including [ERR01-J. Do not allow exceptions to expose sensitive information](#), [DRD00. Do not store sensitive information on external storage \(SD card\) unless encrypted first](#), and [DRD11. Ensure that sensitive data is kept secure](#).

Noncompliant Code Example

This noncompliant code example shows an example where ...

Compliant Solution

In this compliant solution, ...

Risk Assessment

Leaking sensitive information outside a trust boundary is not a good idea.

Rule	Severity	Likelihood	Remediation Cost	Priority	Level
IDS15-J	Medium	Likely	High	P6	L2

Automated Detection

Tool	Version	Checker	Description
The Checker Framework	2.1.3	Tainting Checker	Trust and security errors (see Chapter 8)
